

healthcare design and management magazine (hdm)

2016 Features Guide

hdm is an exciting magazine for professionals involved in the planning, design, construction and management of healthcare buildings. Against a backdrop of new operating frameworks and changing models of care, **hdm** covers government strategy, estates management, cutting-edge interior design, and technical insights into M&E, as well as showcasing innovative new products for the healthcare environment. Regular comment from architects and analysts shows how all this fits together to improve the efficiency, accessibility and quality of the patient experience.

Features

Editorial encompasses both the internal and external environment, providing an insight into design and specification. Every issue is packed with dozens of topical case studies showing the best ideas in design and most-innovative use of materials and technology across all types of health and social care buildings. Product areas range from components making up **the building envelope** to the fullest specification for **patient** and **public areas**, including:

Cladding & roofing	Infection control
Glazing & windows	Building controls
Building controls	Heating, ventilation & AC
Floors & ceilings	IT and communications systems
Acoustics	Sanitaryware
Modular buildings	Landscaping
Doors & access systems	Fire safety & security
Washrooms	Arts
Indoor & outdoor lighting	Furniture
	Carbon reduction

Special focus on Mental Health and Dementia estates

In each edition of **hdm** there is a dedicated *mental health & dementia facilities* supplement. This explores these specialist areas, from projects and design best practice, to the very latest research and innovative products which support the very-specific needs of people with mental health conditions and dementia.

Editor's note

We are always pleased to receive ideas, articles and high-resolution photography for consideration on any of the above topics, and other areas connected to the design of health and social care buildings and estates and facilities management.
